

# Project Manager

## Summary

We are looking for an experienced Project Manager to work in a consulting environment on various client projects. This can be on a contract basis (associate) or as a permanent position.

The role includes leading ObjectSharp software development teams, client teams, and often a mixture of both. It is suitable for someone highly effective, self-directed, a quick study, and able to deal with high levels of uncertainty and change. The person should also have that special combination of technical competence and soft skills.

## Qualifications

**Must Have (note, these are minimum requirements kept low so as not to screen out that special sharp mind who may not have extensive experience in a particular area)**

At least 3 years experience leading software development teams

At least 8 years of experience in software development

Solid understanding of project management principles

Experience with or at least in-depth understanding of Agile

Solid understanding of full SDLC

Experience with or exposure to at least some of these Microsoft technologies: Microsoft TFS, .NET, SharePoint, WPF/Silverlight, MS Project / Project Server, etc.

Excellent communication and presentation skills

Versatile in various office tools: Excel, PPT, Word, Visio

## Nice to Have

Extensive understanding of Agile and experience in leading Agile teams

ScrumMaster certification

Consulting experience
